BIOTECH
SOFTWARE THAT DRIVES BUSINESS

CORPORATE BROCHURE

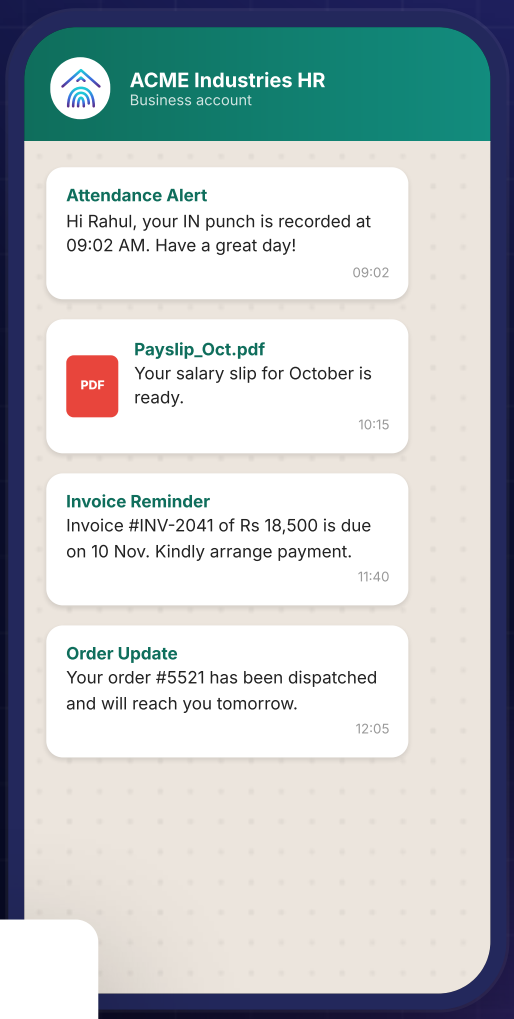

WHATSAPP API INTEGRATION PLATFORM

BioWA

Put WhatsApp messaging inside every software your business runs.

Link your WhatsApp number with a simple QR scan, get a secure API key, and send instant alerts, documents and bulk updates straight from your HRMS, ERP, CRM, billing or attendance system.

- QR based linking
- Single & Bulk API
- Multi client panel
- Works with any software

POST /api/send

```
"to": "91XXXXXXXXXX"
"message": "Hello!"
```

Status: **200 SENT**

WHY BIOWA

Your customers and employees read WhatsApp.
Now your software can talk to them there.

Emails go unread and SMS feels outdated. BioWA connects your existing business software to WhatsApp through a clean REST API, so every important event, from a punch in to a payment due, reaches the right person in seconds. No app changes for your users and no complex setup for your team.

1

Scan QR

Open the BioWA panel and link your WhatsApp number by scanning a QR code.

2

Get API Key

Receive your personal API endpoint and secure key for single and bulk sending.

3

Integrate

Add one HTTP call to your HRMS, ERP, CRM or any in house software.

4

Go Live

Alerts, documents and campaigns start flowing to WhatsApp instantly.

Instant QR Linking

Connect a WhatsApp number in under a minute. No lengthy approval process to get started.

Single Message API

Send a personal text or document to one number with a single API request.

Bulk Message API

Reach many recipients in one call for circulars, payslips, reminders and announcements.

Secure API Keys

Every client gets a unique key, so access stays separate, controlled and easy to revoke.

Role Based Admin

Separate roles for developers, administrators and clients keep every action in the right hands.

Client Management Panel

Create and manage client accounts, account types and access from one clean web dashboard.

Email Notifications

Built in mail setup for account emails, onboarding and system notifications.

Cloud Ready

Runs on a web server and works from anywhere, on desktop or mobile, with no installation for users.

BUILT FOR DEVELOPERS

Simple REST API.
Integrate in an afternoon.

Single | Bulk

```
POST https://your-domain/api/send
// header: X-API-Key: YOUR_API_KEY
{
  "to": "91XXXXXXXXXX",
  "message": "Your IN punch is recorded"
}

POST https://your-domain/api/bulk
{
  "numbers": ["91XXXXXXXXXX", "91YYYYYYYYYY"],
  "message": "Office closed on Friday"
}

// response
{ "status": "success" }
```

Sample shown for illustration. Exact endpoints and fields are in your BioWA panel.

PHP | .NET / C# | Java | Python | Node.js | VB / Excel | Any HTTP client

- **Standard HTTP and JSON**
  No SDK lock in. If your software can call a URL, it can send WhatsApp.
- **Personal endpoint and key**
  Each account receives its own endpoint and key, shown right in the panel.
- **Single and bulk modes**
  One API for one to one alerts, another for broadcasts to a list.
- **Plug in to BIOTECH products**
  Ready fit for BIOTECH attendance, HRMS and SmartOffice Payroll solutions.
- **Support from our team**
  BIOTECH engineers help you connect your existing software.

USE CASES

One API. Every department.

HR & Attendance
Punch in and out alerts, late coming and absent notices, leave approvals.

"Your leave for 12 Nov is approved."

Payroll
Send monthly payslips, salary credit alerts and tax documents to every employee.

"Payslip for October attached."

Sales & CRM
Lead follow ups, quotation sharing, order confirmation and dispatch updates.

"Your quotation Q-118 is ready."

Accounts & Billing
Invoice delivery, payment due reminders and receipt confirmations.

"Payment of Rs 18,500 received."

Education
Student attendance for parents, fee reminders, exam schedules and results.

"Aarav reached school at 8:05 AM."

Healthcare & Services
Appointment confirmations, reminders and report ready notifications.

"Your appointment is at 4:30 PM."
