BIOTECH

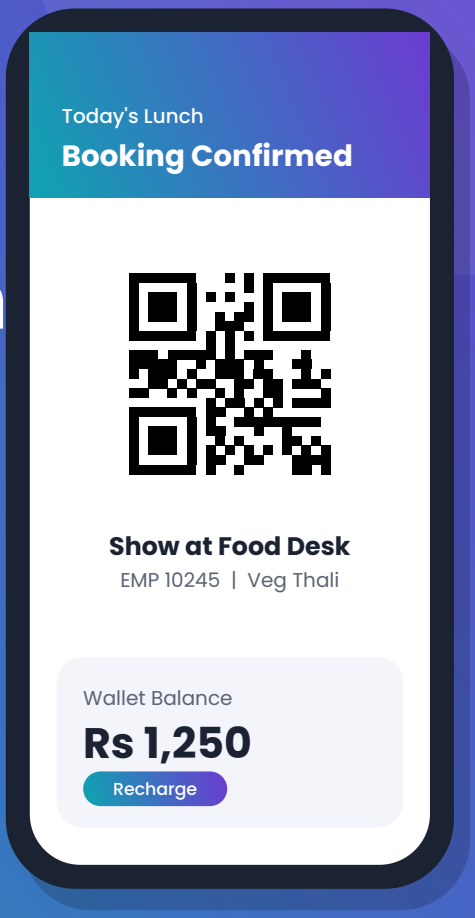

CORPORATE SOLUTIONS

SMART CORPORATE CAFETERIA

QR Canteen Management System

Pre booked meals, QR verified serving, token based collection and a cashless employee wallet. One simple system for your whole cafeteria.

Pre Booking | QR Verify | Smart Token | Virtual Wallet | Live Reports

Why companies choose it

1 Cook only what is booked

The kitchen gets a final planning report when booking closes, so food is made to the real count.

2 No cash, no coupons

Every employee has a virtual wallet. Meals are paid from the wallet automatically.

3 No proxy, no misuse

Food is served only after the employee's own QR is verified at the food desk.

4 Full visibility

Admin and employees get clear reports on bookings, meals taken and wallet use.

HOW IT WORKS

From booking to plate in 6 simple steps

The whole canteen day runs on one connected flow. Employees book ahead, the kitchen cooks to the real count, and every plate is verified and tracked.

1

Book the meal

EMPLOYEE

Employee logs in to their own portal (mobile or desktop) and books the meal before the booking time closes.

2

Booking closes

SYSTEM

At the cutoff time booking is locked automatically. No late changes, no confusion.

3

Food planning report

CANTEEN MANAGER

Manager gets the final food making plan with item wise and shift wise quantities to cook.

4

Show your own QR

FOOD DESK

At meal time the employee shows their personal QR code at the food desk.

5

QR verified, token generated

SYSTEM

The desk system checks the QR against the booking. If valid, a meal token is generated instantly.

6

Submit token, collect food

CANTEEN COUNTER

Employee submits the token at the counter and collects the food. The meal is recorded and the wallet is updated.

Four roles, one system

E

Employee

Books meals, shows QR, recharges wallet, sees own reports

M

Canteen Manager

Gets the food planning report and daily serving count

D

Food Desk

Scans QR, verifies booking, issues meal token

A

Admin

Sets menus, timings, rates, users and views all reports

FEATURES

Everything your cafeteria needs

Employee Self Service Portal

Each employee has a personal login to view menus, book or cancel meals and track history.

Booking Cutoff Control

Set booking open and close times per meal and shift. Booking locks automatically.

Food Making Planning Report

Final quantity report for the kitchen right after cutoff, item wise and shift wise.

Personal QR Identity

Every employee gets a unique QR. Only the booked employee can take the meal.

Instant Token Generation

QR verified at the food desk creates a meal token in seconds. Queues move fast.

Counter Token Collection

Tokens are submitted at the counter, so every plate served is counted and recorded.

Virtual Employee Wallet

Each employee has a wallet. Meal cost is deducted automatically, no cash handling.

Easy Wallet Recharge

Employees recharge their wallet. Admin can also credit amounts or company subsidy.

Menu, Rate and Shift Setup

Manage meal types, daily menus, item rates and shift timings from the admin panel.

Reports for Admin and Employee

Booking, consumption, wallet and billing reports with date filters and export.

Reports at a glance

Admin Reports

- Daily and monthly booking summary
- Meals served vs meals booked
- Food planning and kitchen quantity report
- Wallet recharge and deduction report
- Department and employee wise consumption
- Billing and subsidy report

Employee Reports

- My bookings and meal history
- Meals taken with date and time
- Wallet balance and statement
- Recharge history
- Monthly spend summary
- Upcoming booked meals

BUSINESS VALUE

Built for corporate cafeterias

Less food waste
Kitchen cooks to the confirmed booking count, not guesses.

Shorter queues
QR scan and token in seconds at the food desk.

Zero cash handling
Wallet based payment removes cash, coupons and change.

No proxy meals
Personal QR makes sure only the booked employee is served.

Accurate billing
Every meal is recorded, so vendor and subsidy billing is exact.

Happier employees
Book from anywhere, skip the queue, track every rupee spent.

Ideal for

Corporate Offices | IT Parks | Factories and Plants | Hospitals | Colleges and Hostels | Government Offices | Multi Shift Units

What you get

- Complete setup and configuration at your site
- Employee, canteen and admin user training
- Custom menu, rate, shift and subsidy rules as per your policy
