BIOTECH
Smart software for smarter organisations

Inventory & Asset Management Software

BioStock IMS

Know what you own, where it is, and who has it.

Track every laptop, device, chair and consumable with a QR code or barcode label. Scan to assign, return, transfer and audit, with a complete history of every item and every user action. Runs fully on your own server, even with no internet.

- 100% Offline / LAN
- QR Code or Barcode
- Mobile Friendly
- Full Audit Trail

WHY BIOSTOCK IMS

Stop losing track of company assets

The everyday problem

- Laptops and devices go missing when staff change or leave
- Excel registers are never up to date
- Nobody knows which store has stock
- Physical audit takes days and still has gaps
- No record of who changed what

The BioStock solution

- Every item gets a unique QR / barcode tag
- Scan to assign, return or transfer in seconds
- Live stock for every location and employee
- Scan based stock verification shows missing items instantly
- Every action logged with user, time, IP and remarks

2 sec
to identify any item by scan

100%
offline, on your own server

16
ready reports with Excel export

0
monthly cloud fees

KEY FEATURES

QR or Barcode Scanning
Choose one technology for the whole company. USB scanner, Bluetooth scanner or phone camera.

Unique Asset Tags
Auto tag for every piece with serial no, price, vendor and warranty. Print labels on roll or A4.

Assign & Return
Scan tags, pick employee, done. Expected return date, condition on return, overdue alerts.

Multi Location Stock
Stores, branches and sites. Transfer assets or consumable quantity between locations.

Stock Verification
Physical audit by scanning. Found, missing and extra items listed automatically.

Low Stock & Warranty Alerts
Reorder level per product and warranty expiry list, with optional email alerts.

Full Audit Trail
Every login, edit, scan and export saved with user, time, IP and remarks.

Email Notifications
Welcome, login id, password reset, assign, return and request mails. Each template on / off.

Mobile Friendly
Works on any phone or tablet browser. Animated dashboard with live charts.

HOW IT WORKS

From purchase to write off, every step is tracked

Stock In
GRN with vendor, invoice, serials

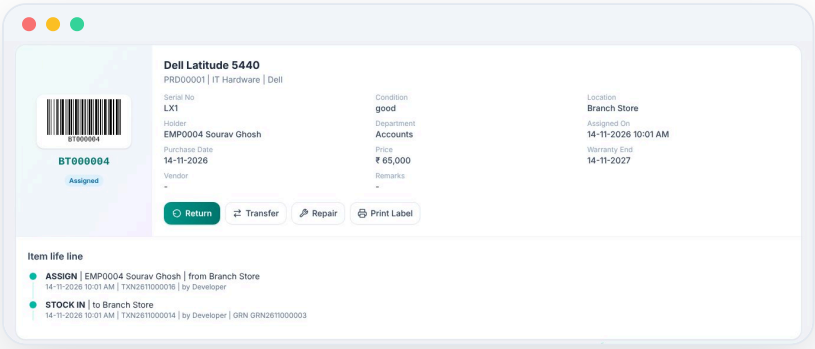
Print Label
QR / barcode tag on item

Assign
Scan tag, select employee

Move
Transfer, repair, return

Verify
Scan based physical audit

Report
16 reports, Excel, print



Scan & Lookup: one scan shows the item, its holder, location, warranty and complete life line, with one click actions.

Scan your way

- **USB / Bluetooth scanner** works on every screen
- **Mobile camera** scan on Android Chrome
- **Type the tag** when no scanner is around
- Labels on roll printers (50×25, 38×25, 75×50, 100×50 mm) or A4 sheets

Employee self service

- Staff see items issued to them
- Raise item requests online
- Get email when request is approved

COMPLETE MODULES
