BIOTECH
SOFTWARE THAT DRIVES BUSINESS

CORPORATE BROCHURE

SECURE FILE SHARING PLATFORM

BIOTECH File Server

Share any file with one secure link that works only once.

Upload documents, reports, designs or backups and send an encrypted download link. The moment it is downloaded, the link is gone for good. No forwarding, no reuse, no leaked copies sitting in old emails.

- Encrypted links
- One time download
- Role based access
- Any browser, any device

THE PROBLEM

Email attachments and open share links stay alive long after you need them.

Salary sheets, contracts and client reports are shared every day. Once sent, they can be forwarded, re downloaded or opened by the wrong person months later. BIOTECH File Server fixes this with encrypted links that self destruct after a single download, so your sensitive files reach only the person you meant, only once.

1
Upload
Log in and upload any file from your computer or phone.

2
Generate
An encrypted, unique download link is created instantly.

3
Share
Send the link by email, WhatsApp or any chat.

4
Expire
After one download the link stops working forever.

Encrypted Share Links
Every link is encrypted and unique, so it cannot be guessed or built by hand.

One Time Download
A link works for exactly one download. Forwarded or reused links simply do not open.

Easy Upload
Upload documents, spreadsheets, images, designs or archives in a few clicks.

Role Based Access
Developer, Junior Developer and Client logins, each with the right level of control.

Client Accounts
Give each client their own login to upload and share files from one central server.

Fast Web Dashboard
A modern single page app. Clean, quick and simple for any user to learn.

Works on Any Device
Upload and download from desktop, laptop, tablet or mobile browser. No app to install.

Your Own Server
Host it on your company server or your own cloud, so your files stay under your control.

THE DIFFERENCE

Built for files that must not travel further.

Capability	Email Attachment	Public Share Link	BIOTECH File Server
Link stops after one download	No	No	Yes
Encrypted, unguessable link	No	Varies	Yes
Safe if the message is forwarded	No	No	Yes
Large files without mailbox limits	No	Yes	Yes
Files stay on your own server	No	No	Yes
Separate logins for team and clients	No	Varies	Yes

WHO USES IT

Every team that shares sensitive files.

HR & Payroll

Share salary registers, payslips, offer letters and employee records securely.

Salary sheet to the accountant, once.

Finance & Accounts

Send balance sheets, invoices, GST files and audit documents to auditors.

Audit pack to the CA, once.

Legal & Management

Deliver contracts, agreements and board reports without leftover copies.

Final agreement to the client, once.

IT & Software
