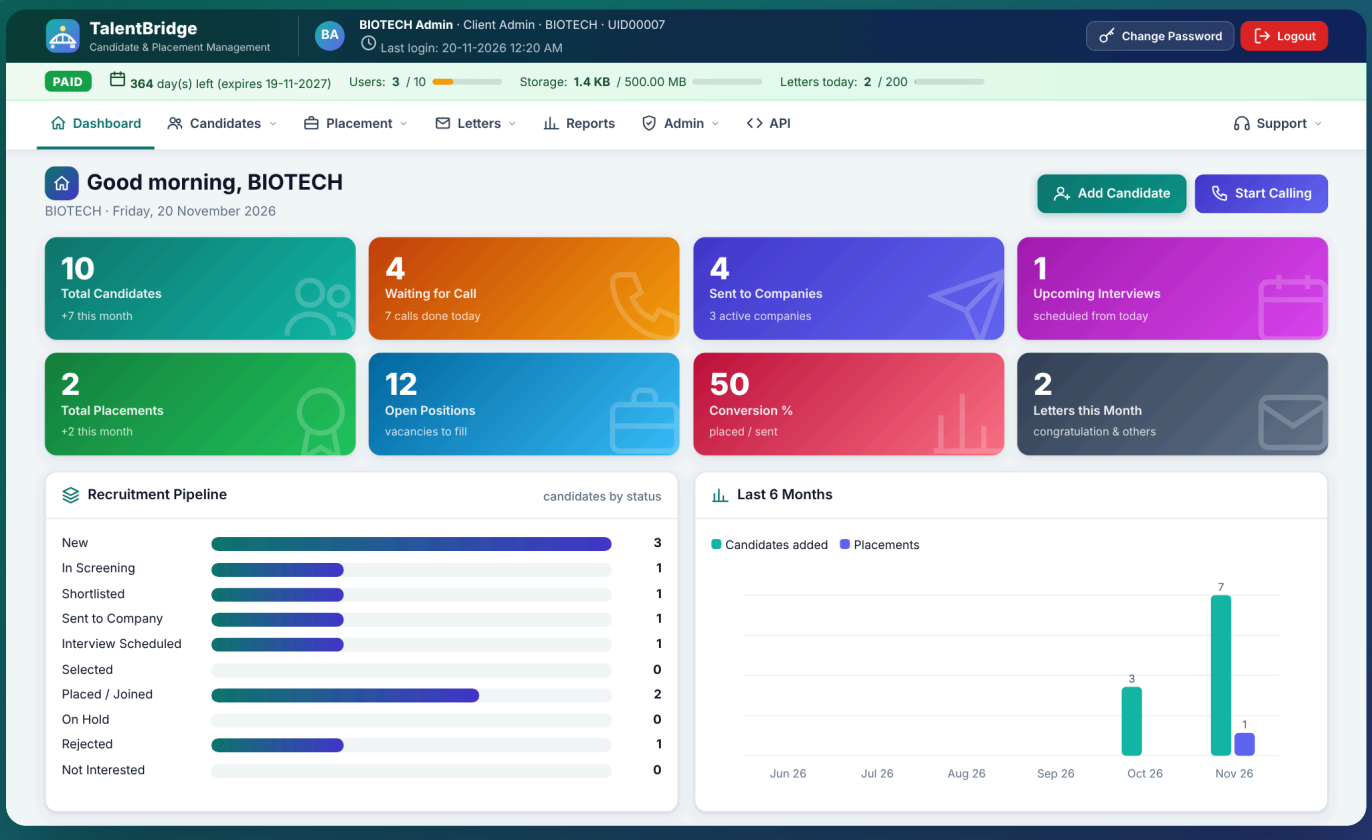
TalentBridge
Candidate & Placement Management

Right candidate. Right company. Every time.

The complete software for recruitment & manpower consultancies — from the first phone call with a candidate to the congratulation letter on joining day.

Telephonic screening | Company & job matching | Interview tracking | Placement letters | Email alerts | Excel & PDF reports | REST API | Works offline

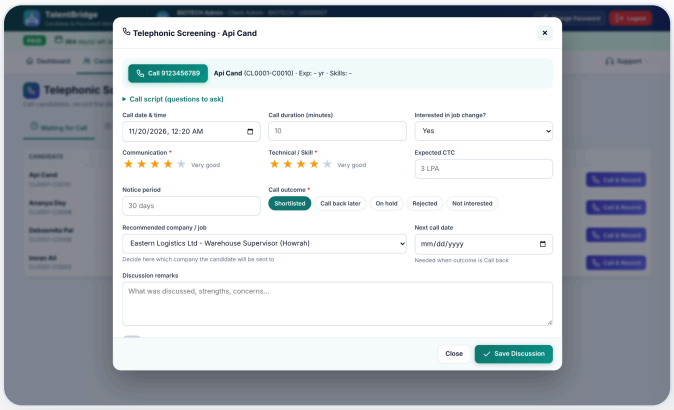


WHY TALENTBRIDGE

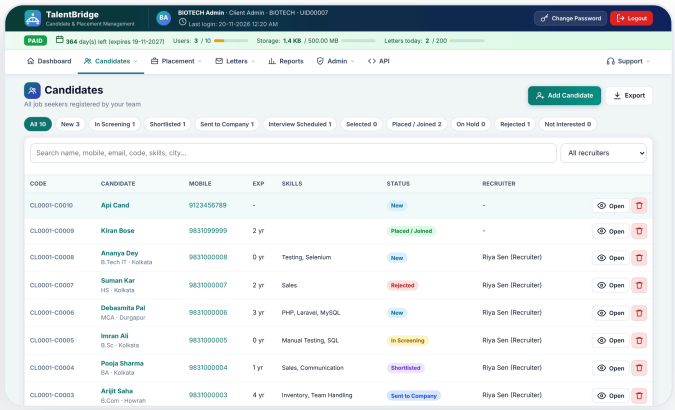
Your consultancy's full hiring journey, in one simple screen.

Most consultancies still track candidates in notebooks, Excel sheets and WhatsApp. Calls are forgotten, the same candidate is entered twice, nobody knows which company has which profile, and letters are typed again and again. TalentBridge puts every step in one place, for every recruiter, on desktop and mobile.

1. **Register** — Candidate + CV, duplicate check
2. **Phone screen** — Call script, ratings, CTC, notice
3. **Decide** — Choose the right company & job
4. **Send** — Profile emailed to company HR
5. **Interview** — Schedule, remind, record result
6. **Placed** — Joining date + congratulation letter



Telephonic screening: ratings, outcome and recommended company in one form



Candidate list with status filters, search and recruiter view

0
duplicate candidates – mobile & email checked automatically

1 click
from placement to a signed congratulation letter PDF

100%
of user actions recorded in the audit log with remarks

FEATURES

Everything a recruitment team needs

Built for consultancies of every size, with one login per recruiter and full control for the owner.

Telephonic screening

Waiting-for-call queue, call script, star ratings for communication and skills, expected CTC, notice period, call-back reminders.

Company & job matching

Employer companies, job openings with openings count, experience and salary. Decide where every candidate goes.

Interview & placement

Profile sent, interview scheduled, selected, joined, rejected, no-show. Joining date and offered CTC recorded.

Letter management

Your own templates with smart fields like {candidate_name}, {company_name}, {joining_date}. Letter register, PDF on letterhead, email.

Email for every step

Shortlisted, interview, placement, letters, login help. Each email can be switched ON/OFF per client. Works offline with an outbox.

Reports – Excel & PDF

Candidate master, screening, submissions, placements, company wise, recruiter performance, letters, users, audit, email log.

Security

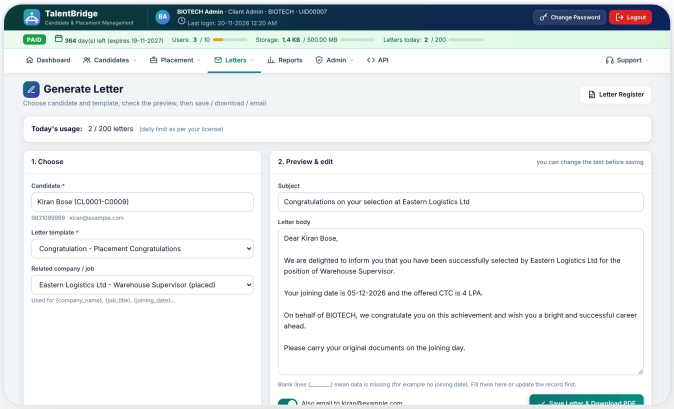
Mobile number login, forced change of default password, account lock on wrong password, reset by email link, auto logout.

Audit trail by UID

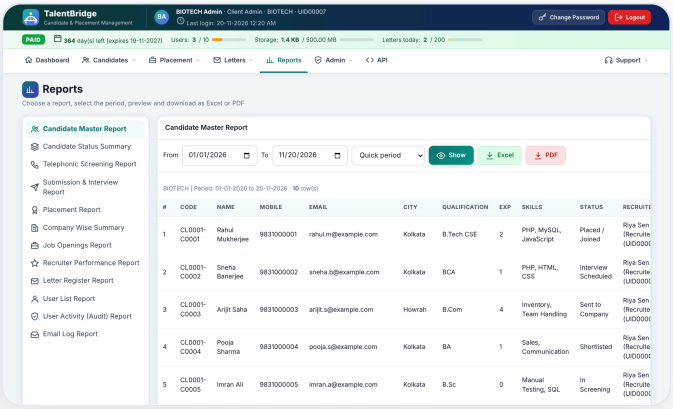
Every action saved with remarks and IP. Users keep a permanent UID, so history stays correct even if a mobile number changes.

REST API

Push candidates from your website or job portal. Ready sample code in PHP, Python, C#, C, Java, JavaScript, Node.js, Go and cURL.



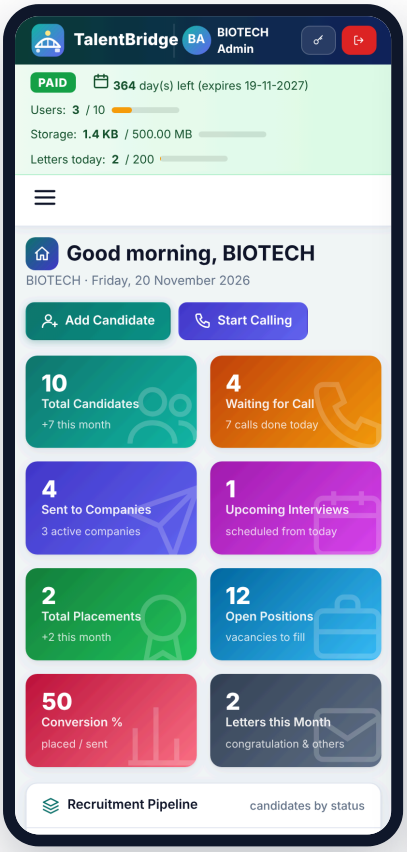
Congratulation letter generated straight from the placement record



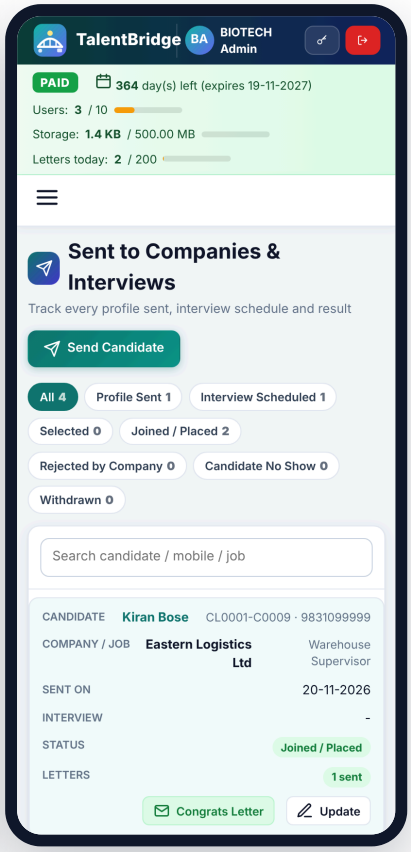
Reports with date filter, preview and Excel / PDF download

ANYWHERE, ANY DEVICE

Recruiters work from the phone. Owners watch from the dashboard.



Live dashboard on mobile



Interviews & placements on mobile

Works offline

Runs on your own PC or office server (XAMPP / any PHP + MySQL host). No internet needed for daily work; emails wait in the outbox until you are online.

Mobile friendly

Same software on desktop, tablet and phone browsers. Tap-to-call candidates during screening.

Multi client

One installation serves many consultancies. Each client sees only its own data, users, templates and API key.

Role wise access

- ✔ **Client Admin** – everything for the company
- ✔ **Recruiter** – daily candidate work
- ✔ **Viewer** – read only + reports
- ✔ Illustrated user manual for each role

Simple technology, easy to own

Core PHP + MySQL (utf8mb4), single page web app, no framework and no external libraries. Clean, commented code that any PHP developer can maintain. Database is created automatically on first run.
